

[RD-BZJ-1600B]Semi automatic flute laminator machine

Features

- The bottom sheets are fed by vacuum adsorption auto feeding unit, while the face sheets are fed manually which is easy operation and feeding paper precisely
- The position of bottom and face sheets are controlled by photoelectric, special elastic front register positioning the bottom sheet does not exceed the top sheet, the front-and-back distance between the top sheet and bottom sheet can be adjusted.
- The pressure part adopts hanging roll suspension Lamination, so as to deliver the sheets smoothly and make the sheets stress uniformly
- The stress belt is moveable backwards and forwards, in order to produce different size of paperboard.
- The main parts of the machine are use the famous brand products, which ensure a long lifetime and good stability

Specification

Model	Unit			RD-BZJ-1600B
Maximum size(WxL)	mm			1600x1100
Minimum size(WxL)	mm			350x350
Speed	m/min			80
Total power	kw			5
Overall dimension	mm			8000x2280x1260
Total weight	T			3.5
